

Title: **AM-51-1 to R11: For an industrial role for electric cars serving the climate, employment, the environment and social justice.**

Tabled by: Greens/EFA Group in the European Parliament

Draft text

Insert after line 51:

- Is at the same time concerned with the existing and potential additional environmental and social impacts of mining of critical raw materials associated with the EV batteries manufacturing, such as Lithium, which is often met with frontal opposition of environmental organisations. Stresses in this regard again the importance of minimising the need of additional raw material through an ambitious circular battery economy in Europe;
